PROJECTS

Text2Motion with Physics-Constrained Generation (<i>MSc Dissertation, in progress</i>)	2026
Generative AI pipeline converting natural language prompts into realistic 3D motion sequences. Modular Python architecture: MoMask generative transformers for motion synthesis, SBERT for semantic parsing of input prompts, and a PyBullet physics engine enforcing biomechanical constraints and environmental interactions.	
IDS/IPS Smart Firewall	2026
Collaborative intelligent firewall system featuring a CNN threat classifier and an RL adversarial agent. Personal contribution focused on system architecture, Snort rule configuration, and developing a DBSCAN clustering module that analyzes runtime payloads to auto-generate rules, reducing ML inference load. Deployed on Ubuntu Server / Kali Linux.	
Hand Gesture Recognition	2025
YOLOv5n object-detection pipeline for hand gesture recognition (HaGRID dataset). Optimised for NPU/CPU deployment via TFLite INT8 quantisation, CLAHE contrast preprocessing, and temporal smoothing to reduce false positives. Developed and benchmarked on Android OS for NXP i.MX.	
Med Assist — Romanian Pharmacy AI Assistant	2025–2026
Full-stack RAG chatbot over the Romanian official ANMDM drug registry (7,555 entries). React + TypeScript frontend; async FastAPI + Pydantic service over Postgres. Hybrid retrieval — FAISS dense embeddings, BM25 sparse search, cross-encoder reranker — feeds Google Gemini; a tool-routing safety layer triages symptom severity and grounds every recommendation in the verified database. Auth0 JWT, Docker, Terraform-managed cloud, pytest with mocked LLM/DB layers.	
Metaheuristic Framework	2025
Python library implementing Canonical GA, Real-Valued GA, Differential Evolution, and Random Search. Each solver is benchmarked on standard mathematical test functions with automated CSV reporting and convergence visualisation.	
fMRI Brain-Age Prediction	2025
Competition ML pipeline predicting biological brain age from ~20k fMRI neuroimaging connectivity features. Gender-stratified ElasticNet model with spectral feature selection; ranked 8th nationally at the WiDS Datathon 2025 University Edition.
